Abundant Annual Ryegrass

Lolium multiflorum westerwoldicum

Highly Palatable with excellent yield and early production.

New for 2007

A generation Tetraploid that has performed extremely well in **Irwin Hunter & Co** trials in WA over the last two years.

Benefits:

- Highly palatable
- Very Good Disease Resistance
- Excellent Yields
- Rapid Establishment

Quick Facts:

Abundant is a well tested internationally including Australia and has proven to be a reliable top performer both in difficult years and good years. Every year and over a number of differing sites **Abundant** has performed at the top of yield which highlights the reliability and adaptability of the variety. **Abundant** produces both high dry matter yields and feed quality producing higher productivity and weight gains in livestock.

It has continued to demonstrate a higher resistance to rust and disease than other varieties. **Abundant** combines early establishment, with a good long growing season, disease resistance and feed quality bundles into one variety.

Abundant annual ryegrass is named exactly the way it performs and appears- abundantly!
