

EVERLAST Perennial Ryegrass

MIN RAINFALL (mm)	550
SEEDING RATE	Kg/Ha
DRYLAND	10 - 15
HIGH RAINFALL/IRRIGATION	20 - 25

Everlast is an extremely hardy frost tolerant grass, ideally suited to marginal perennial ryegrass areas and cooler climates. It has a semi-erect growth habit and is very deep rooted. Everlast is an extremely vigorous winter active perennial ryegrass which is highly persistent and palatable.

Derived from Kangaroo Valley ryegrass Everlast exhibits the same favourable characteristics that have stood the test of time.

Everlast has improved rust tolerance combined with dense tillering ability ensuring abundant high quality forage for grazing.

- Kangaroo Valley germplasm – excellent persistence.
- Extremely vigorous winter and early spring production.
- Suited to marginal perennial ryegrass areas of 550+mm rainfall.
- Widely adapted, semi-erect growth habit and is very deep rooted.
- Frost tolerant and hardy cultivar, able to withstand periods of drought.
- Summer dormant to enhance long-term persistence
